

BANK MANAGEMENT SYSTEM

TEST PLAN DOCUMENT

Test Case 1 – Open Account With Valid Details

Test Case ID	UT_01
Name of Module	Account Management
Test Case Description	Verify that a customer can successfully open a new bank account by providing valid KYC details and an initial deposit of at least ₹500.
Pre-conditions	Customer is accessing the account-opening module and the system is operational.
Test Steps	1. Open the Account Management module. 2. Select Open New Account. 3. Enter valid name, address, phone number and ID proof. 4. Enter ₹500 as the initial deposit. 5. Submit the application.
Test Data	Tester: Harish; Customer: Arjun ; Address: Bengaluru; Valid 10-digit phone number; Valid Aadhaar; Initial Deposit: ₹500
Expected Results	The account should be created successfully and the system should generate a unique 10-digit account number.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 2 – Reject Withdrawal That Violates Minimum Balance

Test Case ID	UT_02
Name of Module	Withdrawal
Test Case Description	Verify that the system rejects a withdrawal that would cause the account balance to fall below ₹1,000.
Pre-conditions	User is logged in successfully and has an active bank account with ₹1,500 balance.
Test Steps	1. Log in to the customer account. 2. Navigate to the Withdrawal module. 3. Enter ₹600 as the withdrawal amount. 4. Submit the transaction.
Test Data	Tester: Rahul ; Customer: Neha Reddy; Available Balance: ₹1,500; Withdrawal Amount: ₹600
Expected Results	The system should reject the transaction because the remaining balance would be ₹900, below the ₹1,000 minimum balance. An insufficient balance message should be displayed.
Actual Result	It should display the message “Insufficient Balance”
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 3 – Lock Account After Three Failed Login Attempts

Test Case ID	ST_01
Name of Module	User Authentication / Login
Test Case Description	Verify that the system locks a user account for 15 minutes after three consecutive failed login attempts.
Pre-conditions	The user account exists and is currently active and unlocked.
Test Steps	1. Open the login page. 2. Enter a valid username/account ID. 3. Enter an incorrect password and submit. 4. Repeat with an incorrect password two more times consecutively. 5. Attempt to log in again immediately.
Test Data	Tester: Ananya ; Customer: Kiran ; Valid Username/Account ID; Incorrect Password entered 3 consecutive times

Expected Results	After the third consecutive failed attempt, the account should be locked and the user should not be allowed to log in for 15 minutes.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 4 – Successful Deposit Generates Transaction Reference and Receipt

Test Case ID	IT_01
Name of Module	Deposit / Transaction Management
Test Case Description	Verify that every completed deposit generates a unique transaction reference ID and receipt and is logged correctly.
Pre-conditions	Customer account is active and the user is authorized to perform a deposit.
Test Steps	1. Log in to the system. 2. Navigate to the Deposit module. 3. Select the customer account. 4. Enter ₹2,000 as the deposit amount. 5. Confirm and complete the transaction. 6. Check the generated transaction receipt and transaction history.
Test Data	Tester: Vikram ; Customer: Sneha ; Existing Balance: ₹5,000; Deposit Amount: ₹2,000
Expected Results	The deposit should complete successfully. A unique transaction reference ID and receipt should be generated, and the transaction log should show the correct post-transaction balance of ₹7,000.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 5 – Generate Admin Report for a Date Range

Test Case ID	IT_02
Name of Module	Admin Reports
Test Case Description	Verify that an admin can generate a report containing total deposits, total withdrawals, and active account count for a selected date range within 10 seconds.
Pre-conditions	Admin user is logged in successfully and transaction/account data exists for the selected date range.
Test Steps	1. Log in as an administrator. 2. Navigate to the Reports module. 3. Select the required start and end dates. 4. Request the transaction/account report. 5. Measure the time taken for the report to be generated. 6. Verify the report contents.
Test Data	Tester: Meera ; Admin: Aditya ; Start Date: 01-08-2026; End Date: 26-08-2026
Expected Results	The report should display total deposits, total withdrawals, and active account count for the selected date range and should be generated within 10 seconds.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 6 – Reject Account Opening Below Minimum Initial Deposit

Test Case ID	UT_03
Name of Module	Account Management
Test Case Description	Verify that the system rejects an attempt to open a new bank account when the initial deposit is less than ₹500.
Pre-conditions	Customer is accessing the account-opening module and the system is operational.
Test Steps	1. Open the Account Management module. 2. Select Open New Account. 3. Enter valid KYC details. 4. Enter ₹400 as the initial deposit. 5. Submit the application.
Test Data	Tester: Rohan ; Customer: Kavya ; Valid KYC details; Initial Deposit: ₹400
Expected Results	The system should reject the account-opening request because the initial deposit is below

	₹500. No account should be created and no account number should be generated.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 7 – Successful Login With Valid Credentials

Test Case ID	UT_04
Name of Module	User Authentication / Login
Test Case Description	Verify that a registered and active customer can successfully log in using valid credentials.
Pre-conditions	The customer account exists, is active, and is not locked.
Test Steps	1. Open the login page. 2. Enter a valid username/account ID. 3. Enter the correct password. 4. Submit the login request.
Test Data	Tester: Divya ; Customer: Aman ; Valid Username/Account ID; Correct Password
Expected Results	The user should be authenticated successfully and redirected to the customer dashboard.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 8 – Successful Withdrawal While Maintaining Minimum Balance

Test Case ID	UT_05
Name of Module	Withdrawal
Test Case Description	Verify that a customer can successfully withdraw money when the transaction does not cause the account balance to fall below ₹1,000.
Pre-conditions	User is logged in successfully and has an active account with ₹2,000 balance.
Test Steps	1. Log in to the customer account. 2. Navigate to the Withdrawal module. 3. Enter ₹500 as the withdrawal amount. 4. Submit and confirm the transaction. 5. Check the updated account balance and transaction history.
Test Data	Tester: Suresh ; Customer: Pooja ; Available Balance: ₹2,000; Withdrawal Amount: ₹500
Expected Results	The withdrawal should be completed successfully. The remaining balance should be ₹1,500, and the transaction should be recorded in the transaction history.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 9 – Transaction History Records Completed Transactions

Test Case ID	IT_03
Name of Module	Transaction Management
Test Case Description	Verify that completed deposit and withdrawal transactions are correctly recorded in the customer's transaction history.
Pre-conditions	The customer account is active and at least one completed transaction exists.
Test Steps	1. Log in to the customer account. 2. Perform or identify a completed transaction. 3. Navigate to Transaction History. 4. Locate the completed transaction. 5. Verify the displayed transaction details.
Test Data	Tester: Isha ; Customer: Rohit ; Completed transaction amount: ₹1,000
Expected Results	The transaction history should display the completed transaction with the correct transaction type, amount, date/time, and updated balance information.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.

Test Case 10 – Reject Invalid Report Date Range

Test Case ID	UT_06
Name of Module	Admin Reports
Test Case Description	Verify that the system validates report dates and rejects a request when the start date is later than the end date.
Pre-conditions	Admin user is logged in successfully and has access to the Reports module.
Test Steps	1. Log in as an administrator. 2. Navigate to the Reports module. 3. Enter a start date later than the end date. 4. Request the report.
Test Data	Tester: Nikhil Reddy; Admin: Shravan ; Start Date: 26-08-2026; End Date: 01-08-2026
Expected Results	The system should not generate the report and should display a validation message indicating that the date range is invalid.
Actual Result	To be filled after manual execution of the test case.
Test Result	To be marked Pass/Fail after comparing Actual Result with Expected Results.
